We Ask Some Questions

‣ What are scientific theories? Do they provide knowledge of reality?

‣ What does it mean to call ourselves theist, atheist, agnostic, or igtheist? Can these words describe the complexity of belief?

We Learn To

‣ We learn to function as adjudicators who “measure” the acceptability of human knowledges and beliefs.

We Expand Our Learning

‣ We approach the topic of science and religion in a neutral fashion from the “outside,” providing us with a classroom of diverse perspectives: philosophy of science, theology, and religious studies. Moreover, we consider how we might apply this learning toward theological work, scientific work, and human life.

What Does This Class Provide?

When: Fall Term 2015
Where: TC 22, Trinity College
Time: Thursdays, 11:10 a.m. to 1:00 p.m.
